

# Custom Wagons Wagon Wheel Chandeliers

## Wagon Wheel Chandeliers

We custom build your wagon wheel chandelier to your specification. You choose the wheel size and type of lights. Our wagon wheel chandeliers are ideal for cabins, rustic vacation homes, farm homes, ranch homes, or any home or room with a western or rustic décor. Our wagon wheel chandeliers are also durable enough for commercial use.

You will find our wagon wheel chandeliers in the movies, at resorts, in university theater groups, theme parks, dinner theaters, our wagon wheel chandeliers are even on Broadway in theaters.

Our wagon wheel chandelier has a solid wood Hub, unless a metal hub is

ordered, and like all of our wheels, it is made with solid steam-bent hardwood construction and hardwood spokes. All of our wheels have forge shrunk steel rims, the wheel rim is 3/16".

Natural finished or stained the beauty, grain and character of the wood shows.

Our wheels are authentic wagon wheels and that is why our wagon wheel chandeliers add a rustic, country, or western decor to any room. Please allow 4 -5 weeks for delivery.

For over forty years we have based our work and reputation on the quality of the products we build and sell, our wagon wheel chandeliers are no exception and they reflect our commitment to quality. Each chandelier is unique and built to the customer's specifications.

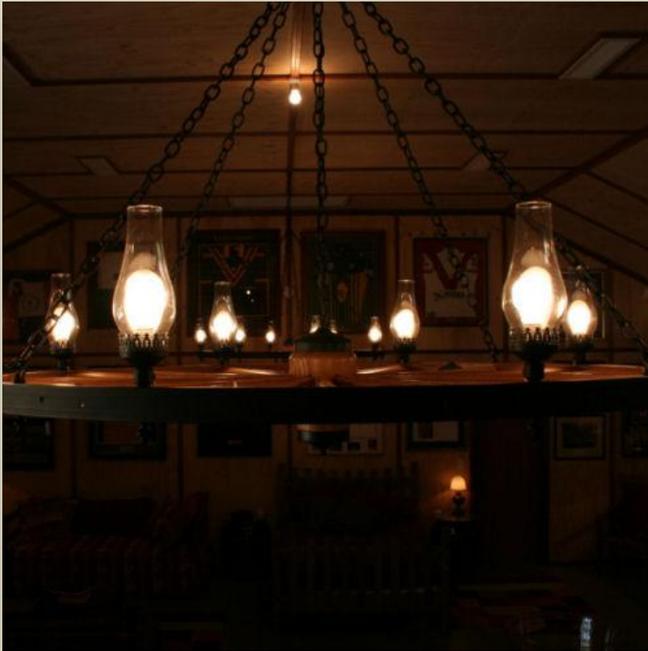

## You Choose The Design

You design your wagon wheel chandelier as plain or as fancy as you want. You can choose the [MinWax Stain](#) for the stain you want for your chandelier, [Choose Your Globes](#), and choose the color of your chain and fixtures, bright brass, antique brass, or mission (black).

## Two Five Foot Chandeliers To Australia

The following pictures are two five foot chandeliers stained Golden Oak with black fixtures that we shipped to Australia. The chandeliers are located on a gentleman's 100 acre hobby ranch in the Southern Highlands of New South Wales. If you saw the movie Babe about a sheep dog in a pig's body, you know how beautiful the New South Wales area is.

If you are wondering what a gentleman's ranch is, well you would have 30 head of cattle (mostly for color), 8 alpacas, a couple of pigs, and 3 horses including 1 ex-racehorse.

The most important thing you can have on a gentleman's ranch is a "Hootenanny Shed".

The Hootenanny Shed is a corrugated iron shed which they fixed up as a party shed and gave a home to two of our five foot chandeliers.

The ranch is located at a high altitude so the nights can be cold. Please notice the lovely fireplaces in the "Shed".

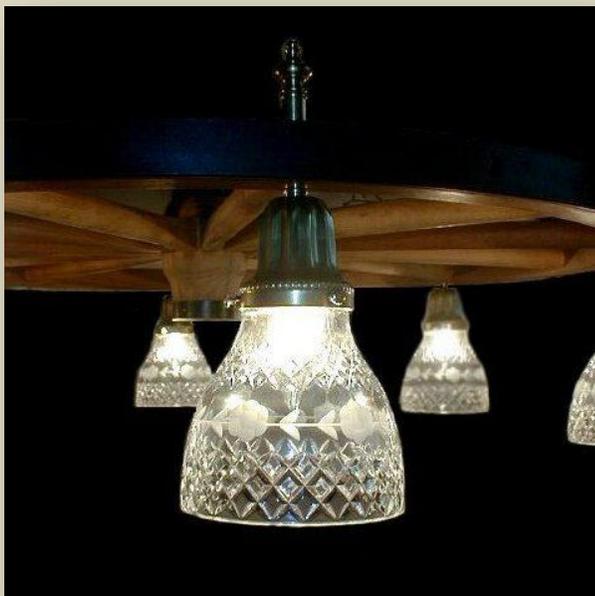

We can custom build any size wagon wheel up to sixteen (16) feet, however, normally the smallest size chandelier we make is 32" and the largest is 72". We also make our chandeliers with a medium hub on a decorative wagon wheel and a large hub heavy wagon wheel. The decorative hub is 6" long and 4" in diameter, the large hub is 8" – 9" long and 6" – 7" in diameter.
